PORTFOLIO •

<https://sujithv-portfolio.netlify.app>

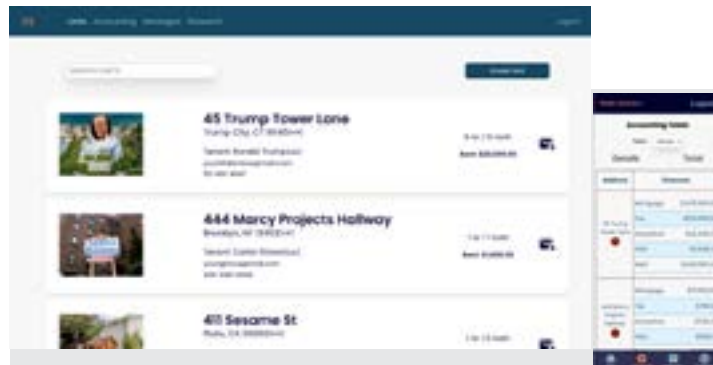

01 SIMPLER FITNESS

Browse through over a thousand workouts tailoring personally to you based on your available equipment and experience level. Built with React, with React Query and Infinite Scroll to retrieve data efficiently from Mongo DB.

02 REALTY SOLUTIONS

For owners of rentals to stay on top of finances and communicate with tenants. Uses MERN stack with mongoose models, authorization using JWT tokens attached to HTTP cookies, API integration from HUD.gov for nationwide market rental rates. Front end uses React router, ContextAPI for global values, and Reducer to manage state.

PROFILE

I am a recent computer science graduate looking to utilize my experience in developing full-stack web and mobile apps to solve real-world problems. My goal is to provide valuable contributions to creating intuitive and efficient software solutions that ultimately produce the most possible satisfying experience for the user.

WORK EXPERIENCE

PROPERTY MANAGER/OWNER, SGS PROPERTIES

2012 - current

Converted business to 100% digital by upgrading old paper lease system to fully digital encrypted leases and scanning all paper documents into digital database

Created detailed advertisements of vacant units which were listed online and sent to local housing agencies to acquire tenants

Prepared quarterly financial statements with income/expenses which helped implement cost-saving measures

PROJECTS

SIMPLER FITNESS

Exercise App, built in React with Chakra UI, to browse through over a thousand workouts from personal Mongo database. React Query and Infinite scroll get paginated query results from Mongo DB.

REALTY SOLUTIONS

Designed for property owners to manage finances and communicate with tenants. JWT authorization with HTTP signed cookies, mongoose models, React Router, contextAPI with reducer, and API integration to find market rent values anywhere in the country.
